

Amendments to the Claims:

Amend the claims as follows:

1. (Currently Amended) A compound represented by the formula:

wherein R is C(O)-(CH₂)_m-X-R₁, wherein m is 0-10, X is [S, O, N or] a covalent bond, and R₁ is ~~[optionally substituted phenyl, optionally substituted cycloalkyl having 3 to 7 carbons forming the ring, optionally substituted fused 2-, 3-, or 4- ring heterocycle, optionally substituted 1- or 2-naphthyl]~~ optionally substituted [5- or] 6-membered heterocycle~~[-optionally substituted anthraquinone, or hemisuccinic acid,~~

~~with the proviso that when m is 0 and X is a bond, R₁ cannot be phenyl or substituted phenyl; when X is a bond, and R₁ is phenyl, m cannot be 2 and when X is O, m cannot be 1].~~

2-7 (Cancelled)

8. (Currently Amended) The compound of claim 1, wherein m is 0 to 3; ~~and X is oxygen or a covalent bond.~~

9-10 Cancelled)

11. (Original) The compound of claim 10, wherein R₁ is an optionally substituted 5-membered heterocycle with an oxygen or one or two nitrogens in the ring.
12. (Original) The compound of claim 11, wherein R₁ is optionally substituted furan-2-yl.
13. (Original) The compound of claim 12, where in R₁ is 5-nitrofuran-2-yl.
14. (Original) The compound of claim 10, wherein R₁ is an optionally substituted 6-membered heterocycle with one or two nitrogens in the ring.
15. (Original) The compound of claim 14, wherein the 6-membered heterocycle is pyridine-3-yl, thymine-1-yl, or piperazine-1-yl.

16-21 (Cancelled)

22. (Currently Amended) A therapeutically effective amount of the [The] compound of claim 1 in combination with a pharmaceutically-acceptable excipient to form a pharmaceutical composition.

23. (Original) The pharmaceutical composition of claim 22, which is in the form of a liposomal composition.

24. (Currently Amended) A method for treating breast cancer in a patient, which method comprises administering a therapeutically effective amount of a compound of claim 1 to the patient.

25-56 (Cancelled)
